

MINCO
CAPITAL CORP.

INVESTING IN NATURAL RESOURCES

TSX-V: MMM

OTCQB: MGHCF

January 2020

Focused on Strategic Investments

Minco Capital is focused on utilizing its strong working capital position, extensive industry contacts and internal expertise to build a portfolio of high-quality investments in publicly traded and privately held corporations, as well as direct ownership stakes in resource projects.

Guiding Principals:

- Capitalize on steadily improving market conditions in the mineral resource sector.
- Enhance returns by using a disciplined approach to focus on opportunities with attractive risk-reward profiles.
- Preserve capital and limit downside risk while achieving a reasonable rate of return.

Commodities

- Emphasis is on value upside and growth potential without being specific to one commodity.
- Commodities considered to date:
 - Precious metals.
 - Base metals.
 - Specialty E-Metals (cobalt, lithium, graphite etc.)
 - Agricultural products.
 - Industrial minerals.
 - Bulk Commodities.

Types of Investments

- Investment selection is directed by an Investment Committee and guided by the Company's Investment Policy.
- The nature and timing of investments depends on the quality of investment opportunities and the availability of capital.
- Types of investment facilities may include:
 - Common shares.
 - Preferred shares.
 - Warrants.
 - Royalties.
 - Convertible debentures.
 - Term loans.

Minco Silver Equity Investment

- 11,000,000 common shares of Minco Silver (18.26%) - acquired in 2004 in exchange for the transfer of the Fuwan property and the silver interest in the Changkeng property located in Gaoming Country approximately 45 km southwest of Guangzhou City, China.
- The Fuwan Silver Project Feasibility Study* includes estimated Reserves of 9.118 Mt averaging 189 g/t Ag which is expected to sustain an underground operation of 3,000 tpd for a mine life of 9.2 years, with an NPV_c of \$111.5M, IRR of 33.2% at \$13.57/oz Ag, with payback in 2.3 years for a capital cost of \$73M.
- Minco Silver is working to obtain the final permits, mine design and mining licence for the project.
- In 2015, Minco Capital sold its 51% interest in the Changkeng gold deposit to Minco Silver for net cash consideration in excess of \$10 million. The Changkeng Gold deposit contains about 3.9 Mt averaging 4.89 gpt Au in the Indicated category and 4 Mt averaging 3 gpt Au in the Inferred category.
- Details regarding Minco Silver and its flagship Fuwan-Changkeng Project, including NI-43-101 Resource and Reserve estimates for Fuwan and Changkeng and Feasibility Study can be found on SEDAR at www.sedar.com and Minco Silver's website at www.mincosilver.ca.

* FUWAN SILVER PROJECT FEASIBILITY STUDY TECHNICAL REPORT, EFFECTIVE DATE: SEPTEMBER 1, 2009, ISSUE DATE: OCTOBER 23, 2009, Prepared by Jianhui (John) Huang, P.Eng., S. Byron V. Stewart, P.Eng., Aleksandar (Sasha) Živković, P.Eng., Scott Cowie, B.Eng., MAuSIMM, (Wardrop, A Tetra Tech Company), Eugene Puritch, P.Eng., P&E Mining Consultants Inc.

Forward Looking Statement

Except for the statements of historical fact, the information contained herein is forward looking in nature. Forward looking information includes, but is not limited to, statements with respect to the future price of minerals and the effects thereof, the timing and amount of estimated capital expenditures, the estimation of mineral reserves and resources, the realization of mineral reserve estimates, costs and timing of proposed activities, plans and budgets for and expected results of exploration and/or production activities, exploration and/or production and permitting time-lines, requirements for additional capital, government regulation of mining operations, environmental risks and reclamation obligations and expenses. This forward looking information is based on certain assumptions that Minco Capital Corp. (the "Company") believes are reasonable, including that the current price of and demand for minerals being targeted by the Company will be sustained or will improve, that the Company's current programs and objectives can be achieved, that general business and economic conditions will not change in a material adverse manner, that financing will be available if and when needed on reasonable terms and that the Company will not experience any material accident, labour dispute, or failure of plant or equipment. Such forward looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievement of the Company to be materially different from any future results, performance or achievements expressed or implied by statements containing forward looking information. Such factors include, among others, results of exploration and development activities; our historical experience with development-stage mining operations; regulatory changes; possible variations in reserves, grades or recovery rates; availability of materials and equipment; timeliness of government approvals; changes in commodity prices, particularly silver prices; general economic, market and business conditions; unanticipated environmental impacts on operations; the availability of capital on acceptable terms; and the other factors discussed in the section of the Form 20F of the Company dated March 31, 2017 entitled "Risk Factors" filed with Canadian securities regulators and available at www.sedar.com.

Certain information contained in this presentation concerning the industry and market in which the Company operates has been obtained from publicly available information from third party sources. The Company has not verified the accuracy or completeness of any information contained in such publicly available information. In addition, the Company has not determined if there has been any omission by any such third party to disclose any facts, information or events which may have occurred prior to or subsequent to the date as of which any such information became publicly available or which may affect the significance or accuracy of any information contained in any such information and summarized herein.

Although the Company has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that statements containing forward looking information will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on statements containing forward looking information. Except as required under applicable securities legislation, the Company does not intend, and does not assume any obligation, to update this forward looking information.

Forward Looking Statement

Readers are advised that National Instrument 43-101 ("NI 43-101") of the Canadian Securities Administrators requires that each category of mineral reserves and mineral resources be reported separately. Readers should refer to the most recent annual continuous disclosure documents filed by the Company available on SEDAR at www.sedar.com, for this detailed information, which is subject to the qualifications and notes set forth therein.

Further information is available in the Company's publicly filed documents available elsewhere on this website and on SEDAR at www.sedar.com.

This presentation uses the terms "indicated resources" and "inferred resources". U.S. investors are advised that while these terms are recognized and required by Canadian regulations, the U.S. Securities and Exchange Commission (the "SEC") does not recognize them. "Inferred Resources" have a great amount of uncertainty as to their existence and their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of "Inferred Resources" may not form the basis of feasibility or other economic studies. U.S. investors are also cautioned not to assume that all or any part of an "Inferred Mineral Resource" exists, or is economically or legally mineable. In addition, the terms "mineral reserve" and "probable mineral reserve" are Canadian mining terms, the definitions of which differ from the definitions of the SEC. Under SEC Industry Guide 7 standards, a "final" or "bankable" feasibility study is required to report reserves, the three-year historical average price is used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority.
